EDUCATION

Mahidol University — **Expected Graduation**
Bachelor of Engineering in Computer Engineering — April 2027

SKILLS

- **Programming** : C, C++, Python, Java, SQL, JavaScript
- **Tools & Platforms** : Docker, Git/GitHub, ChromaDB, Ollama, Roboflow, Kaggle, LINE Messaging API
- **Frameworks & Libraries** : FastAPI, PyTorch, TensorFlow, Pandas, NumPy, OpenCV, Ultralytics
- **Soft Skills** : Project Management, Design Thinking, Ideation, Leadership, Communication

EXPERIENCE & PROJECTS

Work Experience

Research Assistant | Ontario Tech University, Canada
ASEAN-Canada SEED Scholar, Prof. Patrick Hung's HCI lab (Aug 2026 – Present)

- Work hands-on with Unitree Go1 and Go2 quadruped robots using ROS 2 for human–robot interaction research.
- Research and summarise HCI literature for the lab's projects.
- Assist Prof. Hung in teaching the university's HCI course.

Academic Projects

MANORAA | Antibiotic Drug-Design Platform | AI Lead, Mahidol University Capstone (Jun 2026 – Present, in progress)

Using Python, FastAPI, ChromaDB, Ollama, LLM gateway, Docker

- Built Muny, a RAG assistant over 406 protein–ligand structures (51 antibiotics), deployed with Docker on the university server.
- Designed hybrid retrieval (vector + exact lexical match) so PDB ID and ligand-code lookups hit the right record.
- Added an anti-hallucination guard that refuses instead of inventing evidence.

Face Recognition (Python)

Developed a facial recognition tool using OpenCV to identify matching faces from folders.

Smoking Detection (Python)

Developed a Real-Time Smoker Detection System using YOLOv11L and OpenCV to identify Person, Cigarette, and Smoke in indoor environments. The system features a custom logic for confirming violations and sends alerts via LINE Messaging API.

Leadership Experiences

President, ClickCamp15 | Mahidol University (Jan 2024 – Dec 2024)

Led a 4-day computer engineering camp with 500+ applicants and 80 participants, providing high school students with practical learning experiences and insights into the field, while fostering teamwork and growth among 100+ staff members.

President, GearLeague (Inter-Engineering Sports Event) (Jul 2025 – Apr 2026)

Led collaboration among 9 engineering universities with 100+ staff to organize a national sports competition, building strong inter-university relationships and long-term connections across institutions.

Head of Freshmen Welcoming Committee | Mahidol University (Mar 2024 – Sep 2024)

Managed a team of 50 students to design and execute engaging orientation programs, successfully onboarding 100+ freshmen. And partnered with the Student Union and multiple faculties to strategize and coordinate university-wide welcoming events.

COMPETITIONS & AWARDS

Invent for the Planet (global) - 1st Place 2024 · 3rd Place 2025, 2026

- 2024: portable renewable-energy battery for African cities
- 2025: gas-sensor smart fridge with cloud alerts to cut food waste
- 2026: turning rice stubble into high-value cellulose to cut PM2.5.

UniHack 2026 (Chula Tech Startup × CSII) — Participant

For an AI & Safety hackathon on stopping online scams, built a 10-screen interactive prototype of a seller trust score. It helps Facebook, Instagram and TikTok buyers tell honest shops from scam pages, using reviews backed by OCR-checked transfer slips. Live: pornphipat.space/sellified

CFA Society Thailand AI × Finance Hackathon 2026 — Participant

Built ContextOS, a prototype that classifies market events and matches them to historical analogues (1970–2024) to show cross-asset outcomes. Also built a live multi-agent demo that scores how trustworthy a financial claim is, to cut LLM hallucination.

InterCSII Hackathon 2025 – WasteHub Project

Built WasteHub, a mobile platform linking recyclable waste sellers and dealers with reward incentives, improving local waste management efficiency.
